

Enterprise SBC

Connect. Protect. Monitor.

AudioCodes' Enterprise Session Border Controller (E-SBC) products provide businesses with the interoperability, survivability, security and quality assurance required to connect their IP-based communications platforms with branch offices and service provider networks.

Based at the business premises, the E-SBC acts as the demarcation point between the enterprise VoIP network and the service provider's SIP-based services such as SIP trunking or hosted unified communications applications. AudioCodes E-SBCs support High Availability at any scale to ensure uninterrupted communications. They enable secure and reliable connectivity of remote users within a centralized unified communications or IP contact center architecture.

Applications

- SIP trunking
- IP contact centers
- Hosted UC applications
- Remote and mobile worker support
- Connection to multiple service providers
- SIP mediation between UC and IP-PBX systems

AudioCodes E-SBC Benefits

- Broad selection of pure IP and hybrid (IP/TDM) platforms to suit any deployment
- Vast SIP mediation and extensive interoperability
- Complete perimeter defense for the enterprise
- High Availability, Survivability and Resiliency for branch offices and SMBs
- Single managed point of demarcation
- Enhanced Quality of Experience (QoE)
- Software license scalability
