

# Simple, Secure, Online faxing.

*Fax from anywhere and  
at anytime as long as  
you can connect to email*

## *Save time, reduce costs with GFI FaxMaker Online*

As a cloud-based fax service, GFI FaxMaker Online makes sending and receiving transmissions a simple, secure and cost-effective process.

Send faxes directly from an email or application.

Less time is spent sending, collecting and distributing faxes. Each is saved in digital format, enabling better archiving and compliance processes.

With GFI FaxMaker® Online,  
faxing is as easy and  
convenient as sending  
an email

No extra paper, phone  
lines, software or hardware

## BENEFITS

- » Email-to-fax and fax-to-email regardless of email system
- » No additional phone lines, hardware or complex phone systems required
- » Automate faxing from applications. If you can print it, you can fax it
- » Fax from PC, Mac, tablet or any mobile device
- » Eliminate the need for multiple distributed fax machines
- » No installation required\*
- » Just set it and forget it

*\*if you wish to print to fax, the GFI FaxMaker Online fax driver is required*

**GFI FaxMaker™ Online**

*Simple, fast, online faxing*

### Low up-front investment

As there is no software, hardware or complex phone system integration required, GFI FaxMaker Online significantly reduces your investment. With no hardware to maintain, software to install and update, and no paper and toner required, you can reduce power consumption.

### Send a fax from any email system

GFI FaxMaker Online uses email-to-fax and fax-to-email, regardless of which email server you use. It could be Microsoft® Exchange Server 2000/2003/2007/2010, Lotus Notes or any SMTP/POP3 server. If you can connect to your corporate email, you can send a fax.

### Send a fax from any application

To send a fax, users print from their word processor to the GFI FaxMaker Online printer, or create a new message in their email client (for example: Microsoft Outlook®, Outlook Web Access or Gmail™). Users then select the fax recipient(s) from the Outlook contacts list (address book) or enter the fax number directly. After clicking on the Send button, the fax is sent and the user receives a transmission report in his or her email inbox.

### Receive a fax by email in fax or PDF format

One can check faxes from anywhere in the world, either using a regular desktop email system, like Outlook for Gmail, or a web-based email system like Outlook Web Access. Once the fax is received in PDF format it can be easily forwarded and allows for integration within document archiving systems and other workflow procedures your business uses.

### Automated fax delivery/inbound fax routing

GFI FaxMaker Online can automatically route incoming faxes to the user's mailbox based on the line on which the fax was received.

### Archive faxes to GFI MailArchiver®, or other email archiving solution

As GFI FaxMaker Online allows you to receive faxes as email, all faxes can be archived to GFI MailArchiver, or to other email archiving solutions, for faster search and retrieval.

### Send or receive a fax from your handheld or mobile

GFI FaxMaker Online is compatible with smartphones, tablets, laptops, net-books, notebooks and more. If the device has an Internet connection, email capability and a PDF viewer, you're on your way.

GFI FaxMaker Online Activity Log

### Attach Microsoft Office documents, PDF, HTML and other files

It's easy to attach Microsoft Office, PDF, HTML and other files to a fax. The Send to Mail Recipient command, available in Microsoft Office and other applications, can be used to quickly send any document as a fax.

### Send personalized fax broadcasts

Using the mail merge facility of Microsoft Word or of the Office Suite of products, you can send personalized fax broadcasts. Microsoft Office supports Open Database Connectivity, and the recipient list can be retrieved from any data source, including Microsoft SQL Server®, Microsoft Access® and many more.

### Supports Outlook contacts

There is no need to keep a separate fax address book or duplicate address entries; simply select the recipient's Business Fax entry from the Outlook contacts list or Global Address Book.

### Easy Administration

The administration portal allows customers to manage their online fax services from a web browser, making it easy to:

1. Add/edit/suspend/remove users to the service
2. Request new Direct Inward Dialing (DID) inventory
3. Assign users to a Department, for example, sales, finance, human resources
4. Link users to a specific DID
5. Personalize cover pages at the user or department level and upload new cover pages
6. Personalize notification settings such as fax to email delivery success or failure at the user or department level
7. Add/edit/lock/remove service administrators at the company or department level
8. Add/edit/delete departments
9. View activity logs and dashboards displaying critical service statistics, including inbound and outbound fax activity

All you need is an email system and a web browser and you're set to go.
