- ✓ Protects a full range of Windows, Linux, Unix and MAC-based systems
- ✓ Process automation via command line interface and/or Rest API
- ✓ 24x7 manufacturer support

Teamwork  means success
www.sepssoftware.com

As an MSP you provide your customers with data backup concepts as a service and you are responsible for full operation of the data backup landscape. It doesn't matter whether your services are provided on-site on your customers' premises or whether your customers' data is transferred to your own data centre.

The SEP MSP licence enables you to do the job at the very highest level possible. You can choose from two licence models, allowing you to design the best backup environment around your customers needs.

Both licence models include: (extract)

- 25 SEP sesam Backup Servers for secure, physical separation of customer environments
- 125 parallel backup streams
- An unlimited number of Remote Device Servers as DataCollectors and DataCenters
- Unlimited StoragePool and Si3 Deduplication licences
- An unlimited number of Bare Metal Recovery licences for Windows and Linux

Benefits for your customers:

- Predictable monthly costs
- Savings on hardware and software
- Reduced administration costs
- Flexible expansion without size limitation
- Conversion, setup and administration taken care of by SEP MSP
- Get always the latest backup technology
- Costs can be claimed directly as operational expenses
- Professional daily monitoring
- Additional stability through the cloud
- Disaster Management taken care of by MSP
- SLAs as per customer requirements
